## **Magickal Vedic Astrological Advise by Rev. Swati Prakash**

The year 2026 sees a Blue Moon of May, in addition to the regular full moons of the year (12) this 13<sup>th</sup> moon is a lucky sight for some of us who are magickal as it gives us an extra wish fulfilled for the year, simply because full moons are symbolic for fulfilment of your goals while new moons help you sow the seeds and plan ahead for achieving what you aim for.

This year has its share of eclipses too, starting with a solar eclipse called the ring of fire on the new moon of 17<sup>th</sup> February followed by a full lunar eclipse also called a Blood eclipse as it will turn the full moon red on the 3<sup>rd</sup> of March. August will see two eclipses, one total solar eclipse and one partial lunar eclipse. Eclipses are precautionary times to protect from harm, prevent diseases, and ward off misfortunes using magical spells.

### **MONTHLY VEDIC ASTRO PREDICTIONS**

#### **JANUARY**

The year begins on a good note with the auspicious waxing moon phase culminating in the January Full Wolf Moon in Gemini on 3<sup>rd</sup> January. A great time for spells for positive friendships and interactions with your pack. On the 10<sup>th</sup> of January we will see Jupiter in Gemini too, shining at its brightest being directly opposite to Sun. Jupiter has been in retrograde recently therefore it signifies support from ancestral guides or past gurus. Sun, Mars, Venus and Mercury are positioned in Sagittarius in the first half of January, and moving on to Capricorn along with a new moon in Capricorn on the 18<sup>th</sup>, making one focus intensely on aspirational goals before gaining practicality.

#### **FEBRUARY**

1 February brings a fabulous full Snow Moon in Cancer with Imbolc in northern hemisphere and Lammas in the southern, to begin the month with intuitive reflections and meditative insights. A Uranus retrograde will end on 4<sup>th</sup> Feb to clear out stagnant energies in research, awareness, and mystical quests. With Mercury and Venus moving in tandem to Aquarius in the first week, a lot of positive energy will be sent to creative ideas, and scientific discoveries for those in these fields. Enhanced by Mars joining them on the 23<sup>rd</sup>. However a ring of fire solar eclipse with new Moon in Aquarius in Vedic astrology on the 17<sup>th</sup> may bring a shadow of Rahu or lunar north node on the Sun thus obstructing mental curiosity and intellect temporarily and not good for embarking upon any major new initiatives until it ends. Furthermore a Mercury retrograde begins towards the end of the month on the 26<sup>th</sup> making it necessary to plan travel completion well ahead of this date.

#### **MARCH**

A major lunar eclipse will fall on the Full Worm Moon in Leo on the 3<sup>rd</sup> of March, making the moon appear red for quite some time. This is a good time for protection spells to safeguard your position, reputation, and for safety from any unforeseen events. Mercury remains retrograde for most of this month until the 20<sup>th</sup> to bring communication and transport issues to the fore. A retrograde of Jupiter will end in Gemini on the 11<sup>th</sup> to make way for new spiritual lessons.
