Magickal Vedic Astrological Advise by Rev. Swati Prakash

The year 2026 sees a Blue Moon of May, in addition to the regular full moons of the year (12) this 13th moon is a lucky sight for some of us who are magickal as it gives us an extra wish fulfilled for the year, simply because full moons are symbolic for fulfilment of your goals while new moons help you sow the seeds and plan ahead for achieving what you aim for.

This year has its share of eclipses too, starting with a solar eclipse called the ring of fire on the new moon of 17th February followed by a full lunar eclipse also called a Blood eclipse as it will turn the full moon red on the 3rd of March. August will see two eclipses, one total solar eclipse and one partial lunar eclipse. Eclipses are precautionary times to protect from harm, prevent diseases, and ward off misfortunes using magical spells.

A few major turning points of the year would be the transits of Jupiter on the 1st of June re-entering in Cancer in exalted state, on ending of a retrograde period, which is super auspicious for blessings and intuitive guidance, and then on 31 Oct on All Hallows Eve into Leo which is also positive for amplifying spiritual and magickal powers. Rahu will transit on 5 December into Capricorn to join Pluto there, with Ketu tailing in Cancer, bringing new energy into the planet's economy. Mercury Retrogrades from 26 Feb to 20 March, 29 June to 23 July and 24 Oct to 14 Nov may alter travel and communication plans.

MONTHLY VEDIC ASTRO PREDICTIONS

JANUARY

The year begins on a good note with the auspicious waxing moon phase culminating in the January Full Wolf Moon in Gemini on 3rd January. A great time for spells for positive friendships and interactions with your pack. On the 10th of January we will see Jupiter in Gemini too, shining at its brightest being directly opposite to Sun. Jupiter has been in retrograde recently therefore it signifies support from ancestral guides or past gurus. Sun, Mars, Venus and Mercury are positioned in Sagittarius in the first half of January, and moving on to Capricorn along with a new moon in Capricorn on the 18th, making one focus intensely on aspirational goals before gaining practicality.

FEBRUARY

1 February brings a fabulous full Snow Moon in Cancer with Imbolc in northern hemisphere and Lamas in the southern, to begin the month with intuitive reflections and meditative insights. A Uranus retrograde will end on 4th Feb to clear out stagnant energies in research, awareness, and mystical quests. With Mercury and Venus moving in tandem to Aquarius in the first week, a lot of positive energy will be sent to creative ideas, and scientific discoveries for those in these fields. Enhanced by Mars joining them on the 23rd. However a ring of fire solar eclipse with new Moon in Aquarius in Vedic astrology on the 17th may bring a shadow of Rahu or lunar north node on the Sun thus obstructing mental curiosity and intellect temporarily and not good for embarking upon any major new initiatives until it ends. Furthermore a Mercury retrograde begins towards the end of the month on the 26th making it necessary to plan travel completion well ahead of this date.

MARCH

A major lunar eclipse will fall on the Full Worm Moon in Leo on the 3rd of March, making the moon appear red for quite some time. This is a good time for protection spells to safeguard your position, reputation, and for safety from any unforeseen events. Mercury remains retrograde for most of this month until the 20th to bring communication and transport issues to the fore. A retrograde of Jupiter will end in Gemini on the 11th to make way for new
